Weapon Storage Systems

Dasco Storage Solutions designs and builds the most versatile, high-quality weapon storage systems available. We've been manufacturing secure storage systems for over 50 years – and are renowned worldwide for our excellent quality.

Visit dascostorage.com or email nsn@dascostorage.com for more information.

National Stock Number

Dasco is committed to providing the United States Military with the best weapon storage systems available. We're proud to be a part of the National Stock Number program. Our products are found in armories all over the US and trusted by everyone who uses them.

Even elite combat units that make up SOCOM trust our systems to store our equipment. We've worked with them to adapt NSN systems for JSOC, USASOC, MARSOC, AFSOC and NAVSOC.

Quality

Our high-quality storage racks come fully welded, with weapon specific components ready for placement upon arrival at your facility. All of our products are powder-coated with a Sandtex paint finish for added durability. We stand behind all of our storage systems with a 15-year warranty.

Flexibility

Our systems can be re-arranged to suit your storage needs. Even though your product is pre-configured, you can move the components to fit your specific weapons. If you need different components you can choose from over 120 different compatible options.

Changing components takes a few seconds and can be done without any tools. This lets you build a custom setup, even with our pre-configured solutions.

Weapon Storage Components

We're always creating new components for new weapons and storage techniques. For the most up-to-date component options, visit dascostorage.com or contact a storage specialist at nsn@dascostorage.com.
